Tsubaki Power and Performance For the Medical Equipment Industry

TSUBAKIMOTO CHAIN CO.

A wide range of Tsubaki products support the needs of the medical industry.

Meeting customers' needs for quality and functionality and contributing to the creation of reliable equipment.

Tsubaki's extensive line-up of products supports every function of medical equipment, taking advantage of the company's many successes and experience with various applications.

Contact a Tsubaki representative to learn more about the total solutions we can provide when developing new equipment or reviewing existing models.

Tsubaki products for medical equipment needs

Need	Applicable products	Features
Silence	Worm Power Drive®	Reduces vibration and noise thanks to the sliding contact of a worm gear.
	CABLEVEYOR® TKR Series	Quiet thanks to its flexible structure that makes use of the flexibility of plastic.
Safety	Worm Power Drive®	Maintains load using a self-locking worm gear.
	Power Cylinder	Maintains load using a mechanical brake and self-locking worm gear.
Compactness	ZIP CHAIN ACTUATOR®	Allows installation in narrower spaces than with linear actuators.

What is "self-locking"?

A worm reducer is said to be self-locking if the input shaft does not begin to turn when force is applied to the output shaft to turn it from a standstill condition.

Elevating

Power Cylinder

ZIP CHAIN LIFTER®

Pin Gear Drive Unit

Electric Cantilever Lifter

Worm Power Drive®

Coupling

CABLEVEYOR®

MRI Nuclear Magnetic Resonance Imaging Equipment

X-ray X-ray Equipment

Mammography Mammography

CT Computed Tomography System

Power Cylinder
Self-locking
Silent

You can save space by using a Power Cylinder. The integrated self-locking worm gear also contributes to increased safety and quieter operation.

Worm Power Drive®
Self-locking
Silent

Safe and silent thanks to a self-locking worm reducer. Allows for smooth movement of the equipment.

ECHT-FLEX®
No Backlash

Backlash-free and thus ideal for elevating a bed into position. This disc-type coupling can absorb deflection, parallel eccentricity, and axial displacement, and is easy to incorporate into equipment.

Providing Combined Equipment

We offer multi-functional modules each combining the optimal selection of products from Tsubaki Group's expansive line-up. From X-ray generators to bed lifts, Tsubaki offers solutions to customer needs.

ZIP CHAIN LIFTER®

Transferring

ZIP CHAIN ACTUATOR®

Pin Gear Drive Unit

Chains and Sprockets

CLEANVEYOR®

Belts and Pulleys

POWER-LOCK®

CABLEVEYOR®

X-ray
X-ray Equipment

ZIP CHAIN ACTUATOR®
Horizontal Use **Compact**

Can be installed in narrower spaces than linear actuators. It can be installed in any direction, so it can also be used on rotating equipment.

POWER-LOCK®
Maintain Quality

You can eliminate backlash by using "POWER-LOCK". Unlike keyways, "POWER-LOCK" doesn't suffer from backlash even in forward-reverse operations, and thus can safely transfer a bed without loss of performance.

CT Computed Tomography System

Belts and Pulleys
Clean

A bed can be moved over long strokes by using a long belt. Belts are quiet and allow for clean operation.

Specimen Equipment Specimen Equipment

CABLEVEYOR®
Silent

Low noise, low dust "CABLEVEYOR" cable carriers help maintain quiet, clean operations, and can transfer beds smoothly. Available in white upon request.

TOTAL TRAX®

"TOTAL TRAX" is a complete harnessed system featuring a cable carrier and cables/hoses. Cables/hoses with end connectors attached are delivered together with the cable carrier as a set, allowing for quick installation on machinery and equipment. TotalTrax allows users to source from just one supplier and reduce ordering time.

Tilting

Power Cylinder

Self-locking

Silent

A Power Cylinder is used to tilt a gantry and enable image processing for difficult-to-image parts of the body. It offers both safe and silent operation by using a self-locking worm gear.

Power Cylinder

CT
Computed Tomography System

Hanging

ZIP CHAIN ACTUATOR®

Compact

Can be installed in narrower spaces than linear actuators. It can be installed in any direction, so it can also be used on rotating equipment.

Chains and Sprockets

X-ray Equipment

Rotating

Pin Gear Drive Unit

Worm Power Drive®

POWER-LOCK®

Belts and Pulleys

Mini Keeper

Pin Gear Drive Unit

Compact

The gear is installed on the inner side, allowing for compact specimen equipment design.

Pin Gear Drive Units with the gear installed on the outer side are also available.

Specimen Equipment
Specimen Equipment

Worm Power Drive®

Self-locking

Silent

Mammography

Mammography

In mammography equipment, a worm reducer is used for swiveling, compression and lifting, while its self-locking features make it safe and quiet, putting patients at ease.
