Extensive research and development ensure the complete range of Tsubaki components always satisfy the most challenging demands.

- Roller chains offer strength and durability, without compromising noise and weight performance.
- Bush chains with cold forged bushes provide greater strength and durability.
- Silent chains further improve noise performance.
- Tensioners are tuned for accurate chain tension control.
- Sprockets are designed for optimum noise reduction.
- · Levers and guides are available in a range of materials for all applications.

# Why choose Tsubaki?

In such a highly specialised sector of the automotive industry where competition is keen and suppliers are few, what gives Tsubaki the defining edge?

Quality, Delivery, Competitiveness and Service are key to our culture, and built into our product.

They're what makes us world leaders in a highly demanding industry.

The Tsubaki difference TSUBAKIEUROPE

# **AUTOMOTIVE TIMING CHAIN SYSTEMS**

# **Competitive:**

Localised sourcing
Localised manufacturing
Global support
Forward thinking

# The competitive edge

Tsubaki's competitive edge comes from a combination of our insistence for the highest quality standards, our localised sourcing, our global (low cost country) sourcing and our production excellence and expertise.

This ensures that a Tsubaki automotive timing chain system will meet the customers' requirements in all areas.

#### Tested to the limit

The Tsubaki insistence on the highest quality products, and our continuing evaluation of component capabilities is critical to their ongoing improvement.

We simulate and evaluate performance using computer aided engineering, and we evaluate prototypes using test benches and real engines.

Our tests are becoming the standard for measuring timing chain strength
